

ANALYZE, OPTIMIZE, REALIZE

ANALYZE, OPTIMIZE, REALIZE

(AOR) methodology combines 1E's award-winning technology with our unrivalled domain expertise to reduce IT waste and deliver on-going measurable cost savings to our clients

1E's experienced team of Consultants and IT Financial Analysts have a proven track record of minimizing clients' IT spend while increasing efficiency. Rigorous analysis of technical infrastructure is developed into straight forward, accurate reports to identify opportunities and verify cost savings

We continuously revisit and reassess savings projections as part of our constant drive to reduce IT waste.

This on-going approach ensures that every party is satisfied with the results, and we're proud of the deep, lasting relationships we've built with our clients along the process.

"This is the only IT project I've ever worked on where anyone was focused on ensuring a positive return."

Cynthia Buchanan, Windows 7 Migration Project Manager, Baker Hughes
